

Spin triplet supercurrents in thin films of ferromagnetic CrO_2

Proefschrift

ter verkrijging van
de graad van Doctor aan de Universiteit Leiden,
op gezag van Rector Magnificus prof.mr. P.F. van der Heijden,
volgens besluit van het College voor Promoties
te verdedigen op woensdag 19 oktober 2011
klokke 13:45 uur

door

Muhammad Shahbaz Anwar
geboren te Faisalabad, Pakistan
op 5 februari 1982

Samenstelling van de promotiecommissie

Promotor:	Prof. dr. J. Aarts	Universiteit Leiden
Leden:	Prof. dr. C.W.J. Beenakker	Universiteit Leiden
	Prof. dr. ir. T.M. Klapwijk	Technische Universiteit Delft
	Prof. dr. A. Brinkman	Technische Universiteit Twente
	Prof. dr. E.R. Eliel	Universiteit Leiden
	Prof. dr. ir. T.H. Oosterkamp	Universiteit Leiden

Casimir PhD series, Delft-Leiden, 2011-23

This work was performed with financial support from the Higher Education Commission (HEC) of Pakistan, and from de Stichting voor Fundamenteel Onderzoek der Materie (FOM) in the Netherlands.

I dedicate my thesis to the memory of my father **Muhammad Anwar**

Contents

1	Introduction	1
1.1	Superconductivity	1
1.2	Superconductivity in contact with a normal metal . . .	3
1.3	Superconductivity in contact with a ferromagnet	4
1.4	Long range proximity effect	5
1.5	Motivation and outline	7
2	The physics of superconductor-ferromagnet hybrids	10
2.1	Theoretical concepts: triplet superconductivity	11
2.2	Critical current density in S/F _L /F/F _R /S junctions . . .	16
2.3	Spin active interfaces	17
2.4	Chromium dioxide (CrO ₂)	20
3	Growth and magnetic properties of CrO₂ thin films	24
3.1	Introduction	25
3.2	Deposition of CrO ₂ thin films	26
3.3	Crystallography	29
3.3.1	Deposition on TiO ₂	29
3.3.2	Deposition on sapphire	30
3.4	Morphology	31
3.4.1	Deposition on TiO ₂	31
3.4.2	Deposition on sapphire	33
3.5	Magnetic properties	35
3.5.1	Films on TiO ₂	35
3.5.2	Films on sapphire	39
3.5.3	Saturation magnetization as a function of tem- perature	40
3.6	Conclusions	43

4	Transport properties of CrO₂	44
4.1	Introduction	45
4.2	Sample preparation	45
4.3	Results: Resistivity, magnetoresistance, Hall effect . . .	46
4.3.1	Resistivity	46
4.3.2	Magnetoresistance: High field MR	49
4.3.3	Anomalous Hall Effect	50
4.4	Discussion	52
4.5	Results: Low field MR, Rotational scans of MR, Planar Hall Effect	54
4.5.1	Magnetoresistance: Low field MR	54
4.5.2	Rotational scans of MR	55
4.5.3	Planar Hall effect	58
4.6	Conclusion	60
5	Supercurrents through CrO₂	61
5.1	Introduction	62
5.2	Device fabrication	63
5.3	Results; S contacts on CrO ₂	65
5.3.1	TiO ₂ based devices	65
5.3.2	Sapphire based devices	67
5.3.3	Discussion	69
5.3.4	Results; N/F/S contacts	74
5.3.5	Discussion	76
5.4	Conclusions	79
6	Anisotropic magnetothermoelectric power of ferromag- netic thin films	81
6.1	Introduction	82
6.2	Thermal transport phenomena	83
6.3	Experimental	87
6.4	Results	89
6.4.1	Py and Co	90
6.4.2	CrO ₂	91
6.5	Discussion	94
6.6	Conclusions	98
A	An outlook: Co-based lateral junctions	99
A.1	Introduction	99
A.2	Junctions fabrication	100

A.3 Results and discussion	103
A.3.1 Full Co films	103
A.3.2 Co islands	104
B Resistance anomaly of CrO₂ based SFS devices	107
C Control experiments	110
Bibliography	111
Summary	119
Samenvatting	122
List of publications	123
Curriculum Vitae	124
Acknowledgement	125
